PUBLICITY NOT FOR SUGAR TRUST

President Havemeyer in an Address to the Stockholders Tells Them the Company's Polloy of Reticence.

BUT HOLD'S THE LAWS WILL BE OBSERVED.

Wall Street Regards Statement as a Stand Against Inquiries by the Government or Anybody Else.

H. O. Havemeyer, President of the American Sugar Refining Company, furnished a sensation to-day at the annual meeting of the stockholders of the company, which was held in Jersey City. In his yearly report to the stockhold-

ers he took a stand against publicity, and rather indicated that his company would fight all efforts of the Department of Commerce to get information about the affairs of the company. In this connection he said:
"In my report of a year ago I made

the point that a business corporation is an aggregation of individuals and that there were obvious objections to giving to competitors information about corporate affairs-that is to say, the affairs of a union of individuals, which a partnership or individual was not compelled to make public in respect of its or his own affairs. I further stated: Mum to Individuals.

"I repeat the statement as applicable to the present situation."

voicing his objection ito the publicity plan of the Department of Commerce Mr. Havemeyer continued, saying:

stockholders. Any information about the company's affairs, which they as body ask for, the directors will at all times be prepared to furnish. 'Up to the present time the stock

holders have determined that special nformation shall not be given to in dividual stockholders. The directors have conformed to this and they will continue to do so unless instructed

Outside of Mr. Havemeyer's report the meeting was without feature. It was shown that the price of sugar since the formation of the company had materially reduced and that the net cost now was 2.83 cents a pound as against formation of the company in 1877.

stockholders unanimously resolved that the accumulative pr less dividends, paid up to the time of the meeting be reserved as working capital, less such amounts as directors see fit from time to time to declare as dividends. The official acts of the officials of the company and of the directors were also approved.

Those directors of the company whose terms of office expired were re-elected, and the President's report and words against publicity were unanimously approved.

Rockefeller Interested.

Mr. Havemeyer's words caused quite a little discussion on Wall street. The reported action of the Standard Oil Company in refusing to make a statement to the Department of Commerce caused quite a little excitement at the time.and it was several days before it was denied.

The denial only went so far as to say that no refusal had been made for the eason that no request for a statement and been sent to the Standard Oil offi-

cials.

This statement has added force when it is considered that the Rockefellers are interested in the Sugar Company and that H. O. Havemeyer is a director in the National City Bank—the Rockefeller bank. It indicates that the policy or the Standard Oil crowd will be to oppose as far as possible all statements to the Department of Commerce.

Excited Over Colombians. "The report that on Jan. 4 850 Colom bians had landed near the Panama border caused some excitement at the time, but that soon blew jover," said the Sergeant. "The marines have established a base at Empire City, between Colon and Panama, and they re now strung out across the Isthmus. I noticed the report that the Pinzon had been sunk by an American warship did not cause anything like the excitement created by the report that Colombians had landed near Panama."

Another passenger, who said his business was such that he couldn't give his name, said gambling was running full blast in Panama and Colon, and that the Provisional Government had awarded the gambling privilege to two Americans from the West.

"The two most humorous and inter esting things in Panama just now," he said. "are a regiment of natives stationed just outside of Panama and the navy of the new republic. This regi-ment is a wonder and people from the are boys of thirteen, who have difficulty in carrying their guns. When they turn out in their array of uniforms it is a sight to see.

"The navy, too, is truly wonderful. It consists of one private yacht and two launches. Like the army, there is an over-supply of officers. And the pewder they burn! It is a wonder how the appropriation keeps up. They are ever ready to salute everybody and on every occasion. There are visits of state to be made here and there, and everytime there is a salute of many guns. The little boats dart around, and life in the navy must be exciting. The Admiral makes frequent visits to the American ships and all this is an excuse for more salutes."

Washington Declines to Pay for Loss of Panama's Secession and Will Not Be a Party to Hague Case.

WASHINGTON, Jan. 13.-It can be authoratively stated that the administration does not contemplate paying one dollar out of the United States Treasury to Colombia on account of the secession of Panama. Nor will it go before the Hague tribunal as a party to any proceedings growing out of that secession To do either o fthese things, it is stated would be to commit the administration to an admission that it had been utity of wronging Colombia.

On the other hand, it is again an-nounced that the United States Government stands ready to do everything in its power to bring about an amicable Panama. It may be that the latter will consent to go before the Hague tribunal with Colombia and allow that body to decide whether or not she shall make any concessions to Colombia on account of the severance of political fies. THE COTTON MARKET.

After opening off 6 to 21 points today, cotton rallied after the first half hour of trading and prices were on a level with yesterday's final figures. As New Orleans was a liberal seller her some persons thought that the weakn was part of a plan by the South to shake some of the tallers and to proshake some of the tailers and to provide more favorable buying basis. Estimates for receipts at ports were considered more bullish than otherwise, but had little effect. May and July were the most conspicuous in the selling during the initial trading, the former gaining a little on July.

The opening prices were: January, 13.52 bid; February, 13.60 bid; March, 13.75 offered; May, 13.87 bid; July, 13.92 to 13.93; August, 13.46 to 13.41; October, 11.30 to 11.35.

Deaths in Each State from Catarrhal Diseases During Last Census Year. [12th U. S. Census Report, V. III.]

The accompanying map has been carefully compiled from United States documents by The Perura Medicine Company. Columbus, Ohlo. The figures were taken from the latest mertal statistics published by the Government, and entirely agree with the archives kept at The Hartman Santarium.

The figures on each State represent the total number of deaths from catarrhal diseases during the last census year.

This is an appalling state of affairs, This nation has got to confront the fact that catarrh has become a national curse.
